Fix 403 Errors Within Your Course

In Chrome:

1. Click the Vertical Ellipsis button and select Settings.

3. Change the setting to **Allow all cookies**.

2. Select Privacy and security then Cookies and other site data.

\leftrightarrow \rightarrow C \odot Chrome chron	ne://settings/privacy
Settings	Q Search settings
2 You and Google	Privacy and security
a Autofill	
Safety check	Clear browsing data Clear history, cookies, cache, and more
Privacy and security	Cookies and other site data
	Third-party cookies are blocked

The 403 error is caused if either the **Block third-party cookies** or **Block all cookies settings** are checked.

0) Block third-party cookies in incegnite		
۲	Bloc	k third-party cookies	
	Siter can use cookies to improve your browning experience, for example, to keep you signed in or to remember items in your shapping cart		

4. Close the Settings window and refresh the Chrome browser. Navigate to the tile that previously showed an error. The content should now load as expected.

Fix 403 Errors Within Your Course

In Safari:

1. Click the Safari tab and select Preferences.

3. Deselect the checkmark to **Prevent cross-site tracking** next to **Website tracking**.

5. The content should now load as expected.

 In the Preferences window, select the Privacy tab. Notice the field Website tracking will be checked.

4. Close the **Preferences** window and refresh the Safari browser. Navigate to the tile that previously showed an error.
